Have you ever wanted to create something on the computer other than playing games, typing letters, or managing accounts? Would you like to let your creativity run wild and make your own video game? This class teaches students the basics of creating 2D and 3D computer games by using a visual editor. Students will learn about video gaming, how to create computer games, elements that are important to include in games including sprites, backgrounds, rooms and more! This is a FUN class for any future 'video gaming engineer'. At the conclusion of the class each student will burn work onto CD-Roms to take home for continued creative fun!
